EDUCATION

University of California, Santa Cruz
B.S. Computer Science with Honors

Graduation: June 2026
Cum Laude

WORK EXPERIENCE

REC (My Recommendation App) | Frontend & UI/UX Lead

Summer 2026

- Built and shipped iOS features in Flutter/Dart on a live production codebase with a Ruby on Rails REST backend and Firebase push notifications
- Designed and implemented a 7-screen onboarding flow in Figma and Flutter, owning visual polish, iconography, and interaction states

University of California, Santa Cruz, Reader

Spring 2025 - June 2026

- Served as Reader for four CS courses: CSE 20 (Python), CSE 102 (Data Structures and Algorithms), CSE 120 (Computer Architecture), and CSE 109 (Quantum Computing)
- Developed Gradescope rubrics and coordinated with instructors on edge cases (RISC-V, cache memory, algorithm proofs, quantum computing), maintaining grading consistency across classes of 60-300 students

City of Anaheim | Software Engineering Intern

Summer 2022

- Collaborated with city officials to identify and analyze infrastructure inefficiencies in pooling and irrigation systems, proposing data-driven solutions to improve drainage throughput

Brainly | Super Moderator, Tutor

Summer 2018 - Summer 2022

- Managed a team of 30 tutors in math, physics, and CS; trained new members, evaluated peers, and ensured site safety for a student audience

RELEVANT PROJECTS

Job Search Command Center (Next.js, Google Sheets API, Vercel) | [Demo](#) | [Code](#)

Summer 2026

- Developed and deployed a full-stack dashboard integrating the Google Sheets API via service-account authentication, supporting real-time application tracking, timezone-aware staleness detection, and automated response-rate calculation on Vercel

SAT Lesson Plan Generator (Python, Groq API, pdfplumber) | [Code](#)

Summer 2026

- Built a Python CLI that parses College Board SAT/PSAT Score Report PDFs and generates time-blocked study plans via an LLM API; engineered prompt guardrails to ground references, enforce original questions, and prevent hallucination

PepTrack App (SwiftUI, Firebase, USDA API, Groq API) | [Demo](#) | [Code](#)

Fall 2025 - Winter 2026

- Built a full-stack iOS nutrition tracking app in a team of 5 (Agile/Scrum); led UI across dashboard, onboarding, goals, profile, and progress views in SwiftUI
- Integrated Firebase Auth/Firestore and the USDA FoodData Central API for accounts, food logging, macro tracking, and real-time sync; added XP/streaks, hydration goals, and AI meal suggestions via Groq API

Computer Graphics Projects (WebGL) | [Demo](#)

Winter 2026

- Built progressively complex WebGL scenes (interactive drawing tool, Minecraft-style world, 3D space scene with 20+ geometry types and GLTF models) with dynamic lighting, mouse-look camera, procedural terrain, and a day/night cycle

EXTRACURRICULARS

Sigma Omicron Pi, Secretary, Academic Chair, Sergeant-at-Arms, VP Philanthropy

Winter 2023 - June 2026

- Led weekly business meetings, managed cabinet agendas, and ensured compliance with national requirements
- Planned and executed multi-chapter philanthropy events including dog toy drives, food/clothing donations to a local shelter, and volunteer work with Second Harvest Food Bank
- Promoted academic engagement through study groups, monthly presentations, and peer mentorship

Women In Science And Engineering (WISE)

Fall 2022 - Spring 2023

- Organized leadership workshops and mentored new members; competed in the Santa Cruz Hackathon (CruzHacks)

SKILLS

Python, Java, C, C++, Assembly, HTML, CSS, Javascript, LaTeX, Data Analysis, Machine Learning, Microsoft Office (Excel, Powerpoint, Word), Swift, SwiftUI, Firebase/Firestore, SQL, Xcode, Git, REST APIs, iOS Development, WebGL, Three.js, GLSL, Computer Graphics, Flutter, Dart, Figma, Ruby on Rails, AI Proficiency
